Master Data Management Standard

Section 1 - Purpose

(1) Master data management (MDM) is an approach for ensuring the organisation's master data is captured, maintained and referenced in a consistent, uniform and accurate state, and available across all processes and systems where it is needed.

Section 2 - Authority

(2) Authority for this document is established by the Information Governance Policy.

Section 3 - Scope

(3) This standard applies to all staff of RMIT Group responsible for the management of master data.

Section 4 - Standard

(4) The Master Data Management Standard is available as a PDF.
